

Bulk feed tank automated cleaning

BULK FEED TANK CLEANING

Animal Feed protection with silo hygiene.

When it comes to feed storage, hygiene is an important element for succeeding in animal husbandry. Clean feed can only be provided for animals from an uncontaminated, professionally cleaned silo. When it comes to cleaning silos, it is crucial that every corner of the silo is ridded of old feed remains and dirt, and strict hygiene legislation is complied with.

Our silo cleaning system guarantees optimal cleaning a high pressure water jet can reach every corner of the silo interior thanks to the vertically and horizontally rotating cleaning head.

The cleaning is complemented by highly effective foaming detergents of very high biodegradability and disinfectants (100% biodegradable. Zero residues for the environment) applied by the system itself.

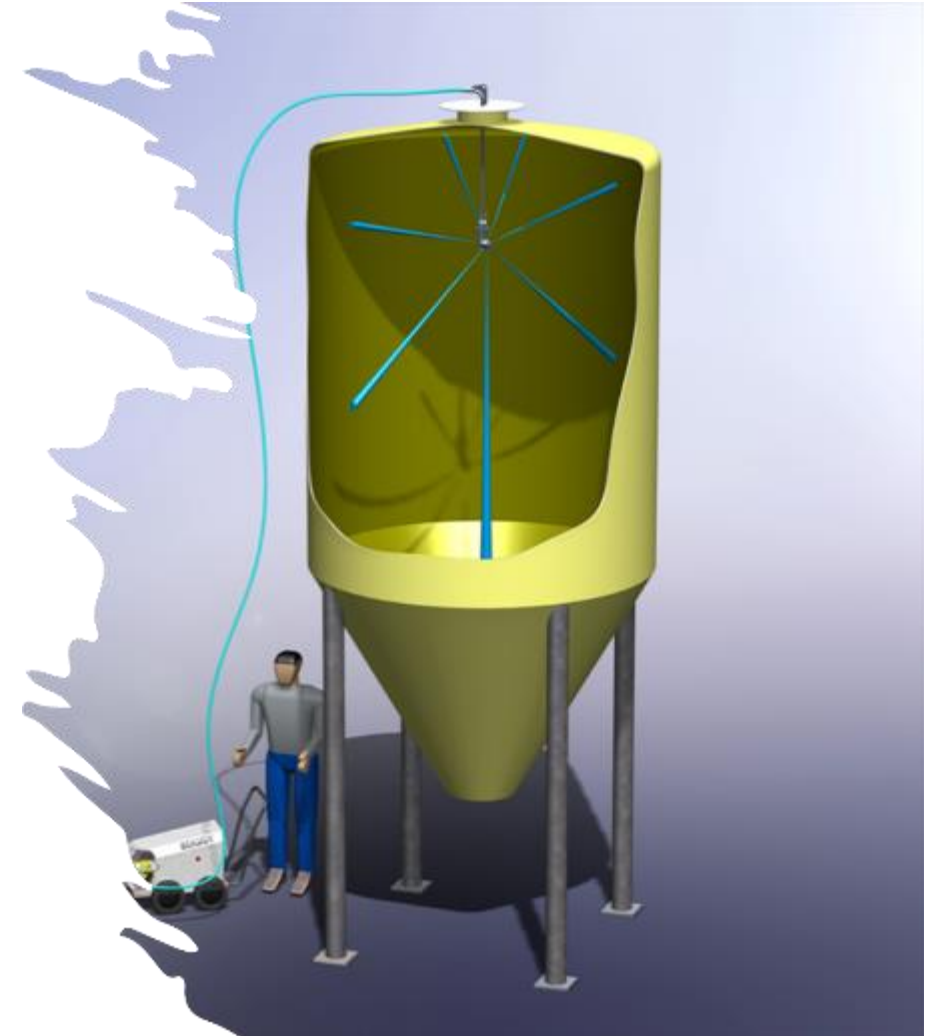

BULK FEED TANK CLEANING

Features

- ✓ Interior silo cleaning
- ✓ Disinfection of silo interior
- ✓ Without spraying shadows - penetrates into all corners
- ✓ Inexpensive and highly effective
- ✓ Low unnecessary set-up times, no silo retrofitting or additions needed
- ✓ Hot water cleaning possible
- ✓ Addition of customized chemicals possible
- ✓ Reduced personal risk - no need for operators to enter the silo

BULK FEED TANK CLEANING

How does it work

The core technology:

High pressure orbital self rotating water jetting head

The result:

Highest cleaning efficiency in silo

BULK FEED TANK CLEANING

Core components

Self propelling
orbital rotating
high pressure
cleaning head

Stainless Steel hose
reel, with reel brake
and swivel joint

Powerfull double flange
motor 11 kW, specially
designed for water
jetting pumps

High pressure 350
bar water pump

Water powered
metering pump and
water filter unit for
accurate doising of
chemicals

Flexible ½''
hydraulic hose

Robust stainless steel
and hot dip galvanized
charriot

Manual gun, 250 bar,
and stainless steel lance
1400 mm

All equipment made in

Your professional silo cleaning solution

Your specialist in **grain silos**
and **feed tanks** for 25 years
