

INDUSTRIAL DNA · GLOBAL DELIVERY · SINCE 1983

***Engineering & On-Site Support
for OEM, EPC and Manufacturers***

You design. You sell. We deliver — on the ground, in your name.

FOR OEM / EPC PARTNERS

From grain manufacturing DNA to global engineering delivery

AgroInPro was born from SAN JOSE (Spain, 1983), a manufacturer of grain dryers, silos and handling equipment — including rice and paddy drying systems. That industrial DNA shapes how we approach every project: we understand factory QA, design-to-production gaps and what it takes to make equipment perform reliably in the field. Since 2014, we have delivered professional engineering, supervision and on-site execution internationally — under your brand, to your standards.

1983

Industrial origin
manufacturing grain
& drying equipment

2014

AgroInPro established
as professional
services firm

20–25+

Years' experience
across senior
delivery team

4

Global offices:
Spain · Singapore
Vietnam · Hungary

EN/ANSI /AS

Standards alignment
across European, US
and Australian codes

Rice & paddy drying specialists · Grain storage & handling · Feed mill & flour mill experience · Multi-commodity bulk operations

Extra capacity, lower execution risk, no permanent payroll

01

ENGINEERING CAPACITY

Senior engineers and designers available by hour, week or project — calculations, detailing, 3D models, drawings, manuals, Eurocode & ATEX compliance reviews.

02

DOCUMENTATION & COMPLIANCE

RAMS, HSE, ATEX, RFI and tender documentation to European standards — strengthening contractual position and reducing site risk.

03

SUPERVISION & PROJECT MANAGEMENT

Multi-project management, white-label site supervision and commissioning — under your brand, with European safety culture. Our most deployed service line.

04

MANUFACTURING IN VIETNAM

Component fabrication, structures and special equipment manufactured in Vietnam under European quality control — at competitive economics.

ONE GROUP · FOUR SPECIALISED DIVISIONS

AgroInPro

Consulting & On-Site

YSE

YourSiloEngineer

YSS

YourSiloSoftware

YSC

YourSiloCleaning

Site Supervision & Project Management

Our most deployed service line worldwide

All on-site services are delivered under your name and brand. Your client sees your team — backed by our specialists, European safety culture and two-generation sector experience.

Multi-Project Management

Coordinated management of several international projects simultaneously — under your project numbers and client interface.

White-Label Site Supervision

Mechanical, electrical and civil supervision under your brand — VCA and IOSH-trained staff, European working and safety standards.

Complete Assembly Delivery

Full assembly of grain handling, drying, rice and storage installations executed under our responsibility — in selected countries, on your behalf.

Commissioning & Training

Equipment commissioning, dry tests, operator training and handover documentation — closing the gap to reliable operation.

After-Sales & Preventive Maintenance

Annual maintenance contracts, software-supported planning, long-term monitoring and trained crews under AgroInPro supervision.

Technical-Commercial Sales Support

Pre-sales technical engagement, site scoping, tender support and translation of technical proposals into client-language requirements.

Hybrid model available: local subcontractors + AgroInPro supervision and QA — combining cost efficiency with European quality standards.

Engineering, Software & Cleaning — one contract, full access

YSE · YourSiloEngineer

Engineering Outsourcing

- Peak-load capacity: calculations, detailing, 3D models, drawings
- Senior personnel rental — by hour, week or month
- Eurocode, ANSI & AS compliance; ATEX technical file preparation
- Independent calculation & manual reviews for third-party verification
- Vietnam fabrication: structures, silos, conveyors under EU quality control
- Know-how transfer — silos, grain dryers, rice drying, machining & auxiliaries

YSS · YourSiloSoftware

Digital Tools

- BULK-WISE — white-label SaaS for preventive maintenance & spare-parts control
- White-label channel opportunity: your logo, your brand, your recurring revenue
- Multi-manufacturer platform — manages entire plant, not just your equipment
- After-sales revenue stream: service orders and spare parts flow to you
- YSS-SILOS3D — calculation software for silo manufacturers (EN/ANSI/AS)
- BOM, cost estimation and design optimisation from the calculation model

YSC · YourSiloCleaning

Distribution Opportunity

- SiloCleaner Pro: effective in silos up to 6 m diameter
- Thorough interior disinfection without spray shadows
- Hot-water cleaning and customised chemicals via metering pump
- No confined-space entry — reduced personnel risk
- High-margin after-sales product for your end-client catalogue
- Distribution agreements adapted to territory and exclusivity

One contract with AgroInPro gives you access to all four divisions — engineering, on-site, software and cleaning.

Selected international references

Client identification withheld under confidentiality

United Kingdom · EPC PARTNER

Biomass pellet storage silos, ship unloader & conveying — project management, commissioning.

Hungary · MANUFACTURER CLIENT

Wheat storage 72,000 t — erection supervision, dry test and commissioning.

Egypt · OEM CLIENT

Wheat storage 60,000 t at 200 t/h — site management, commissioning and operator training.

Spain · END-USER OWNER

Drying & storage 20,000–30,000 t — grain, seed and paddy rice drying systems.

Thailand · OEM CLIENT (APAC)

Storage & dryer supervision under client brand — feed mill and brewery contexts.

Vietnam · MANUFACTURING HUB

Structures, tanks and components fabricated on client designs for international projects.

"The local team you didn't have to hire"

Three ways to start working with us

01

Let's meet

Book a call. We walk you through real delivered projects and discuss fit.

02

Send your bid pipeline

Share 1–2 active tenders. We return a fit analysis and proposal in 5 days.

03

Try us on-site

Assign us one supervision or commissioning job. See our professionalism before anything bigger.
